*Fig. 32.-Distribució de la clorofil.la a al port de Maó.**A) Mitjana per a cada estació de totes les observacions corresponents als períodes indicats.**B) Distribució espacial mitjana corresponent a tot el període de mostreig (secció longitudinal del port).**C) Situació de les estacions de mostreig (segons M. Duran i X. Jansà).*

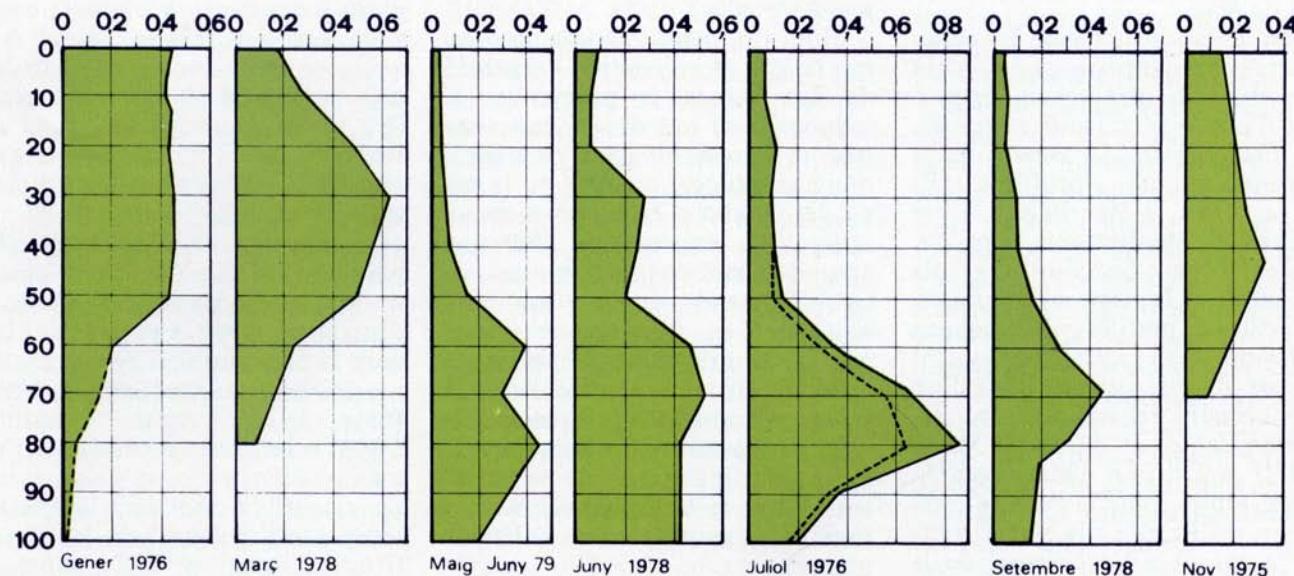

Fig. 13 (Dalt).—Distribució vertical de la clorofil·la a a la zona NW i S de Mallorca en diferents èpoques (mitjana de les estacions pregores del mapa, en base a mesures fluorimètriques i espectrofotomètriques), segons M. Duran i X. Jansà.

(Dreta).—Situació d'estacions hidrogràfiques al NW i S de Mallorca. Algunes d'aquestes estacions foren visitades en distintes èpoques al llarg d'un interval de temps que abasta des de 1975 fins 1979.
