

FEEDBACK REPORT

Calvià (ES)

Foreword

This document contains the feedback from the Joint Research Centre Covenant of Mayors (CoM) team to the signatory after having completed the analysis of the submitted Sustainable Energy and Climate Action Plan (SECAP).

The analysis focused on the compliance of the SECAP documents with the Covenant formal commitments and principles as well as on the evaluation of the completeness, coherence, and consistency of MyCovenant data and SECAP documents, following the criteria:

General Criteria:

1. The SECAP is approved by an official body (in principle the municipal council).
2. The mandatory data and information provided in MyCovenant are complete and correctly filled-in, as per the Reporting Guidelines.

Mitigation Assessment Criteria:

3. The SECAP clearly specifies the overall CO₂ reduction target.
4. The results of the Baseline Emission Inventory (BEI) are provided and cover the key sectors of activity.
5. The SECAP lists a set of actions aimed at reaching the identified mitigation target in the mitigation key sectors, including at least 3 Key Mitigation Actions.

Adaptation Assessment Criteria:

6. The SECAP includes at least one adaptation goal.
7. The SECAP includes a complete local Climate Risk & Vulnerability Assessment (RVA).
8. The SECAP lists a set of actions aimed at reaching the identified adaptation goal(s), including at least 3 Key Adaptation Actions.

Additionally, the analysis aims to provide observations and recommendations for potential improvements to the SECAP. However, the definition and selection of adequate actions designed to achieve the identified goals/targets are entirely the responsibility of signatories, as they need to be tailor-made to the territorial circumstances.

Covenant of Mayors
for Climate & Energy

Overall evaluation

We are pleased to announce that your plan meets the evaluation criteria, as described above. Congratulations on this achievement!

Nevertheless, please note that some aspects should be enhanced or clarified in your SECAP. These are described in the next section together with other suggestions for potential improvements. We recommend addressing these observations and carrying out the suggested modifications.

The Covenant of Mayors Technical Helpdesk would like to thank you once again for the time spent and the efforts that you have devoted to producing your Sustainable Energy and Climate Action Plan.

With best wishes and kindest regards,

*on behalf of the
Covenant of Mayors team*

Ispra, 30th January 2023

Detailed comments on MyCovenant template and provided SECAP documents

The analysis has pointed out the following recommendations and/or minor issues. We suggest addressing them and, if relevant, carrying out the recommended modifications.

Long-term vision

1. We note that the current long-term vision of your SECAP could be more detailed. Please, report a clear and more specific long-term vision so that it does carefully address both mitigation and adaptation to climate change.

Baseline Emissions Inventory (BEI): 2005

2. Your ELECTRICITY consumption per capita in the residential buildings sector (3.27MWh per capita) significantly deviates from the average value for the year (1.52MWh per capita). Although local data can widely vary from national statistics, this might highlight a mistake in the inventory. You might find it appropriate to double check your data.
3. The GASOLINE consumption per capita in the TRANSPORT sector (3.04 MWh per capita) significantly deviates from the average for the year in your country (1.66 MWh per capita). Although local data can widely vary from national statistics, this might highlight a mistake in the inventory. You might find it appropriate to double-check your data.

Risk and Vulnerability Assessment

4. In order to have a better picture of the risks and vulnerabilities of your municipality, it is highly advisable to add the adaptive capacity factors as well as vulnerable population groups. This will allow you to better select the adaptation actions that address the vulnerabilities in your territory.

Mitigation Actions

5. You have not indicated any implementation costs related to your action plan in the template. We strongly recommend you fill this field whenever possible to allow for more detailed monitoring of your actions.
6. A significant number of the actions reported in your template do not contain related project management information on expected energy savings/renewable energy production and/or estimated emission reduction. We strongly recommend you to fill-

Covenant of Mayors for Climate & Energy

in these fields to allow for more detailed monitoring of your actions. When doing so, please pay attention to key actions.

7. Congratulations for having local electricity generation measures in your action plan! We noticed that you have not reported any local electricity production was reported in your baseline emission inventory (BEI) part of your template. In case some electricity was already produced locally in your base year, we strongly recommend that you also report it in your inventory. This will allow you to account correctly for the new emission savings associated with the local renewable electricity generation in your Monitoring Emission Inventories.

The Covenant of Mayors Technical Helpdesk is managed by the Directorate for Energy, Transport and Climate of the European Commission Joint Research Centre and the Covenant of Mayors Office in Brussels.

Please note that this document and the consequent possible SECAP acceptance are by no means related to the Strategic Environmental Assessment provisions set in the Directive 2001/42/EC of the European Parliament and of the Council of 27 June 2001 on the assessment of the effects of certain plans and programs on the environment or to any other possible assessment: this feedback is to be intended only for the purposes set within the context of the Covenant of Mayors initiative.

The output of this report is based on an analysis of the data provided in the SECAP template and does not imply any approval of its content by the European Commission. The responsibility of the measures and figures reported in the SECAP document and template remains with its authors.

The sole responsibility for the content of this document and the related information lies with the authors. It does not necessarily reflect the opinion of the European Commission. The European Commission is not responsible for any use that may be made of the information contained therein.
