

## Energia solar tèrmica 2005

Taula 12

| ENERGIA SOLAR COL-LECTORS TÈRMICS |  |  |                              |
|-----------------------------------|--|--|------------------------------|
| Any                               | Superfície instal·lada (m <sup>2</sup> ) | Superfície total instal·lada (m <sup>2</sup> ) | Capacitat de producció (tep) |
| 1983                              | 3.497                                    | 13.213   | 860                          |
| 1984                              | 4.908                                    | 18.121   | 1.179                        |
| 1985                              | 3.477                                    | 21.598   | 1.405                        |
| 1986                              | 3.721                                    | 25.319   | 1.647                        |
| 1987                              | 3.210                                    | 28.529   | 1.856                        |
| 1988                              | 3.300                                    | 31.829   | 2.071                        |
| 1989                              | 1.009                                    | 32.838   | 2.136                        |
| 1990                              | 858                                      | 33.696   | 2.192                        |
| 1991                              | 510                                      | 34.206   | 2.225                        |
| 1992                              | 1.458                                    | 35.664   | 2.320                        |
| 1993                              | 2.761                                    | 38.425   | 2.500                        |
| 1994                              | 1.600                                    | 40.025   | 2.604                        |
| 1995                              | 4.300                                    | 44.325   | 2.883                        |
| 1996                              | 1.600                                    | 45.925   | 2.987                        |
| 1997                              | 3.435                                    | 49.360   | 3.211                        |
| 1998                              | 2.135                                    | 51.495   | 3.350                        |
| 1999                              | 2.366                                    | 53.861   | 3.504                        |
| 2000                              | 2.680                                    | 56.541   | 3.678                        |
| 2001                              | 1.592                                    | 58.133   | 3.782                        |
| 2002                              | 3.630                                    | 61.763   | 4.018                        |
| 2003                              | 2.678                                    | 64.441   | 4.192                        |
| 2004                              | 5.571                                    | 70.012   | 4.554                        |
| 2005                              | 622                                      | 70.634   | 4.595                        |
