

Your islands. Your holidays. Your contribution.

What's that tax about?

Since July 1st 2016, the Sustainable Tourism Tax is levied on all overnight stays in tourist accommodations on the Balearic Islands. Thanks to your contribution, we are able to make major investments to compensate the territorial and environmental impact of tourism on Mallorca, Menorca, Ibiza and Formentera.

Purposes

Environment

The first and most important purpose is the protection, preservation and recovery of the environment. This means, for example, improving protected natural parks and strengthening the conservation of natural ecosystems and native fauna and flora.

Sustainable Tourism

Thanks to the tax revenue, we are also able to invest in promotion of sustainable and low-season tourism: If more people come to visit us in autumn, winter or spring, we can create more jobs. To achieve this, we recover walking and cycling routes and improve waymarking, for example.

Cultural heritage

Another purpose of the tax is the recovery and rehabilitation of historic and cultural heritage. If we repair historical buildings and archeological sites, we can make them accessible to you, our visitors – this gives you the chance to get to know our culture and history.

Research

Promoting scientific research projects that contribute fighting against climate change or that are related to tourism will allow us to maintain the islands just as they are today: surrounded by a clean and healthy sea and with a sound environment. It will also help us to improve and modernize even more everything we are currently offering to you, our visitors.

Training and jobs

Improvement measures for training, the creation of qualified jobs and a higher employment rate in the off-season are among the objectives to be achieved with the help of tax revenues: For example by means of a more varied vocational training offer.

Tax rates

The new rates of the Sustainable Tourism Tax for all stays in tourist accommodation of the Balearic Islands went into effect on January 1st 2018.
